

The All-New i30

# Fastback

# Discover Style.

The All-New i30 Fastback is a unique statement of style. Created for you, confident and perfectly proportioned. Its dynamic contours and innovative design come together to create a level of elegance that will touch your sense for the good things in life. Designed to stand out – this stylish 5-door coupe indulges you with good looks and great performance.

# Discover Looks.

Design is more than form, it's a feeling you get. That special something that keeps drawing your eye back in for another look. And with its sloping silhouette and graceful roofline, i30 Fastback is a true beauty to behold. Together with the exclusive 17" alloy wheels, the high-performance headlamps and LED daytime running lights add further eye-catching elements to its bold, elegant look.

Headlamps and LED daytime running lights.

# Discover Shape.

At the rear, the timeless beauty of the sporty fastback flows into the generously curved rear spoiler. Inspired by a drop of water, the C-pillar treatment and rear windscreen are designed with soft, elegant shapes to reinforce the car's tapered belt line. Expressive design details like the unique rear lamps and bumper further establish an air of sleek and elegant sophistication.

# Discover Performance.

No matter what road you take: straight-line motorway or curvy city street – the i30 Fastback makes getting there more fun. Featuring a lowered body, sporty suspension tuning and a powerful turbo engine, it also performs as beautifully as it looks. To provide an even more dynamic and agile driving experience, the chassis has been lowered and the stiffness of the suspension has been increased – while still delivering an exceptionally high level of comfort.

# Discover Detail.

Have a seat in the i30 Fastback and you'll feel it instantly. The attention to detail. The passion for materials and craftsmanship. Like the 17" Alloy wheels, exclusive to the i30 fastback, and the high quality materials used throughout the roomy interior. Beauty is in the details and they have been taken care of for you here.

The simple elegance of the dashboard, cabin surfaces and fixtures creates a premium feeling of quality and space. And in the middle of it all is the floating 8" touch-screen for navigation and multimedia, ideally positioned for easy interaction and great visibility.

# Discover Apple Carplay.

Stay connected in the city or head out on the motorway with your favourite playlist – the i30 Fastback gives you the seamless connectivity you expect and innovative tech that makes life easier. The navigation system features state-of-the-art highlights like Apple CarPlay™ and Android Auto™ so you can connect your phone and have your music, phone and app functions right there on the large 8” touch-screen. It also comes with a free seven-year subscription to LIVE Services with weather, traffic and speed camera information in real time.

8” touch-screen display

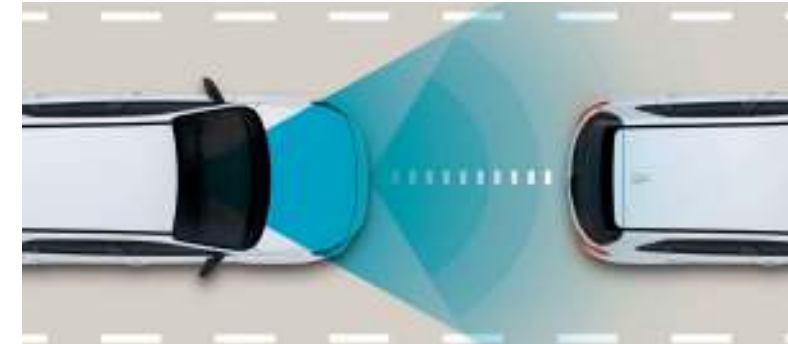

Apple CarPlay™ is a registered trademark of Apple Inc. Android Auto™ is a registered trademark of Google Inc.

# Discover Hyundai SmartSense

With Hyundai SmartSense, our cutting-edge Advanced Driver Assistance Systems, the i30 Fastback is leading the segment with the latest active safety technology – built to provide you with more safety and peace of mind. The i30 Fastback's array of advanced active and passive safety features are there to protect you and your passengers in the case of an accident.

**Autonomous Emergency Braking.** Operating in three stages using camera sensors, it warns the driver visually and audibly. In a second step, it controls the brakes according to the collision danger stage, and in a third stage applies maximum braking force to avoid a collision or minimise damage if a collision is unavoidable.

**Lane Keeping Assist (LKA).** At speeds over 60 km/h the system alerts the driver about unsafe movements. In case of an unintended lane departure, it will warn the driver and can apply counter steering torque to guide the car back to a safe position.

**High Beam Assist (HBA).** High Beam Assist detects oncoming vehicles as well as vehicles in the same lane ahead at night, and automatically changes from high beam to low beam as appropriate.

**Driver Attention Warning (DAW).** This standard feature raises safety and convenience to an entirely new level by continuously monitoring and analysing driving patterns. When a pattern of fatigue or distraction is identified, DAW gets the driver's attention with an audible alert and pop-up message suggesting a break.
